World Class Performance
in Abrasive, Scaling and
Corrosive Slurries, Sludge,
Liquids, and Bulk Solids

INSAMCOR[®] - PB
Ported Blade Knife Gate Valves

INSAMCOR® PB (Handwheel)

INSAMCOR® PB (Pneumatic)

DFC's purpose is to solve typical and perennial valve problems. We achieve this by providing quality valves that provide the lowest cost of ownership and operation, highest reliability and minimum lifetime maintenance.

DFC's Insamcor range of ported blade knife gate valves features replaceable elastomer sleeves and a ported blade that enables large size particles to be drawn into the valve body and remove flushed from the valve.

Design Features and Advantages

- 150 psi CWP (10 bar) pressure rating for all sizes
- Bi-directional flow and shut-off resulting in zero downstream leakage
- No seat cavity for unwanted solids to build-up and prevent full gate closure
- Field replaceable heavy duty elastomer sleeves
- Ported blade is always in contact with the replaceable sleeves on both sides
- Suitable for wet or dry service
- Capable of drawing granular dense slurries of size similar to the blade thickness through the seals and flushed from the valve
- Ported blade bottom door extension with increased clearance and flushing points allows medium to be dumped or drained
- Standard bellows provide additional protection for the spindle against scoring from abrasive particles
- The mounting plate is designed to accept manual, pneumatic or electric actuation for easy conversion in the field

World Class Performance

INSAMCOR®

PB in Open, Intermediate and Closed Position

Sealing Principle

Two identical elastomer sleeves are permanently compressed against either side of the ported gate in both the open and the closed position. When the valve is fully opened the port in the gate aligns itself perfectly with the elastomer sleeves forming a full bore cavity free bubble tight seal to contain the line pressure.

When the gate moves from the open to closed position the elastomer sleeves remain compressed against the sides of the gate and allow media particles the diameter of the gate thickness and smaller to be drawn into the valve body and flushed from the valve.

Specifications

Size Range

2" – 24" (DN50 – DN600)

Pressure rating

150 psi CWP (10 bar)

Body & Yoke

Fusion bonded epoxy ductile iron body with fusion bonded epoxy mild steel yoke plates

Sleeves

Natural rubber standard

Gate

304L stainless steel

Flange Drilling

ANSI B16.5 Class 150

AS 2129 Table D & E

PN10 & PN16

In the fully closed position the sleeves remain compressed against the sides of the gate and seals the bore from both directions

The round shape of the INSAMCOR PB sleeve is maintained by an embedded stiffener ring located near the sealing face and a steel disc on the mating face. Flexibility in the axial direction is achieved through the provision of a 360° groove located along the inner surface of the sleeve.

Optional

Pressure rating

Sizes 2" - 6" (DN50-DN150) available as a 230 psi CWP (16 bar) valve

Sleeves

EPDM, FKM/FPM or NBR

Gate

Different gate materials available on request

Actuators

Manual, manual bevel gear, pneumatic, electromechanical and hydraulic

Features

1. **Spindle cover** - for protection against slurry splatter
2. **Drive Mechanisms** – pneumatic cylinder, electric, hydraulic cylinder, manual bevel gear and handwheel with rising spindle
3. **Thrust assembly** - all sizes fitted with thrust bearings as standard
4. **Mounting Plate** - designed to accept manual, pneumatic or electric actuation without modification
5. **Yoke** - design allows for easy mounting of proximity and limit switches
6. **Lockout** - provision for lockouts in the open and closed position (standard on all sizes)
7. **Sleeve** - natural rubber moulded sleeve
8. **Stuffing Box** - external seal arrangement to atmosphere by means of an adjustable external stuffing box design and gland packing
9. **Seat Pockets** - full bore, unrestricted flow area. No valve seat pocket or cavity
10. **Gate** - Ported, to draw granular media into the valve body to be dumped or drained
11. **Bottom Door** - chamber designed to catch all dumped media. The removal of the bottom door permits material to be dumped with each operation. This option is only advised if spillage is allowed and the preferred flushing system cannot be installed
12. **Flushing Points** - five flushing points allocated for flushing. The flushing system permits material to be flushed out with each operation eliminating material build up. This option is preferred as spillage is contained

ELASTOMER QUALITIES SELECTION

Elastomer Type Abbreviation	Natural Rubber NR	Ethylene Propylene EPDM	Fluorocarbon FKM/FPM	Nitrile NBR
Max continuous operating temp. (°F)	190	300	390	200
Max continuous operating temp. (°C)	88	149	199	93
Abrasion resistance	Excellent	Very Good	Good	Good
Generally resistant to	Moderate Chemicals, Organic Acids, Alcohols, Ketones, Aldehydes	Animal and Vegetable Oils, Ozone, Strong & Oxidizing Chemicals	All Aliphatic, Aromatic & Halogenated Hydrocarbons, Acids, Oils	Many Hydrocarbons, Fats, Oils, Greases, Hydraulic Fluids, Chemicals
Generally attacked by	Ozone, Strong Acids, Fats, Oils, Greases, Most Hydrocarbons	Mineral Oils & Solvents, Aromatic Hydrocarbons	Ketones, Esters & Nitro containing compounds	Ozone, Ketones, Esters, Aldehydes, Chlorinated and Nitro Hydrocarbons

INSAMCOR® PB Specification

Heavy duty ported blade knife gate valve shall be a wafer, bi-directional valve with flushing abilities. The bore shall be formed by two heavy duty elastomer sleeves, one either side of the gate integrally moulded with a stiffener ring. The stiffener ring shall maintain the shape of the sleeve. The sleeves shall be compressed between the pipe flanges once installed.

The valve shall be of full port design. The stainless steel gate will always remain in contact with both sides of the blade in the open and closed position. On closing particles of similar size to the valve's blade thickness shall be capable

of being deposited into the lower chest area of the valve. In order to prevent build-up of product the flushing ports shall be piped up and fully operational or the bottom door removed. The sealing to atmosphere must be achieved through an adjustable stuffing box seal.

The yoke design will allow for easy mounting of proximity or limit switches. Provision must be made for lockouts in the open and closed position. The mounting plate must accept manual, pneumatic or electric actuation for easy conversion in the field.

World Class Performance Slurry Valves

RF Valve® and aiRFlex® pinch valves

The world's most complete line of pinch valves in standard ASME/ANSI B16, DIN and ISO face-to-face dimensions from 1" to 60" (DN25 to DN1500)

- Patented non-stretch, anti-stress folds in all elastomer tubes
- In-line elastomer tube change capability without removing the valve from the pipeline
- Most advanced wear sensing technology for preventative maintenance alert

DFC® SKG F & W slurry valves

Heavy duty bi-directional knife gate valve designed for slurry applications

- Flanged & Wafer design available
- Packingless design
- Full port formed by two heavy duty elastomer sleeves
- No seat cavity for unwanted solids to build and prevent gate closure
- No metal parts in contact with flowing media

Saunders® A Type and KB Type diaphragm valves

Simplicity in design coupled with more than 75 years of cutting edge innovation has resulted in the Saunders diaphragm's ability to handle a wider range of fluids than any other valve type

- Available in weir and straight through type
- Available in either flanged or screwed ends
- Various lining and diaphragm material options

DFC manufactures this range under license from CPFT Ltd and is only available in selected African countries.

Insamcor® MH slurry valves

Bi-directional high pressure wafer mono-flange knife gate valves suitable for end-of-line installation

- Sizes 2" to 24" (DN50 - DN600)
- Available in 230 psi CWP (16 bar) pressure rating on all sizes
- Combination re-packable primary transverse seal and secondary adjustable stuffing box seal for severe applications
- Mechanically retained moulded seal with no seat pockets
- Gate guided through full length of the stroke

Insamcor® MLB slurry valves

Bi-directional large bore wafer mono-flange knife gate valves suitable for end-of-line installation

- Sizes 28" to 48" (DN700 - DN1200)
- Pressure ratings varies according to size and application
- Combination re-packable primary transverse seal and secondary adjustable stuffing box seal for severe applications
- Mechanically retained moulded seal with no seat pockets
- Gate guided through full length of the stroke

Insamcor® LW semi-lugged slurry valves

Bi-directional wafer semi-lugged knife gate valve designed for slurry applications.

- Adjustable stuffing box to atmosphere
- Mechanically retained moulded seal with no seat pockets
- Self-cleaning flush out corners prevent slurry build-up in sealing area
- Easy mounting of proximity or limit switches
- Sizes 2" to 24" (DN50 to DN600)
